

I support XM Satellite Radio. As a long distance truck driver, I depend on the traffic and weater reports to plan my trips. Not everyone can go on-line to get updates. XM keeps me informed. Local land based radio is good but you can't pull in the signal early enough to make trip adjustments. I strongly urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.
